

CS 230 : Discrete Computational Structures

Spring Semester, 2021

Assignment #0

Due Date: Monday, February 1

Suggested Reading: Rosen Sections 1.1 - 1.2

Work on the problems at the end of the sections. You will be tested on these next week.

1. Are you allowed to talk to other students when you are working on your homework?
What kind of collaboration is allowed?
 - a We can collaborate with other students to brainstorm ideas at a higher level.
Solutions must be written alone.
 - b Must note who you collaborated with.
2. What kind of online sources can you use for homework and how should you acknowledge them?
 - a We can use lecture videos and office hours.
 - b Anything else must be referenced in the assignment.
3. What happens if your solutions are found to be very similar to that of another student or to an online source?
 - a You will be suspected of academic dishonesty and potentially investigated
4. When will the exams be held? What materials are you allowed to reference?
 - a March 8, April 12 at 8:15 – 9:45 pm
 - b Open book and notes, but no internet searches
5. Are you expected to attend class and contribute to class discussions?
 - a It's optional, but you are expected to attend and contribute because there are in-class assignments.
6. What are the different ways you can ask for help in this class?
 - a Office hours, asking in lectures, COM S Help Room, Tutoring, SI Sessions, email.
7. What resources are available on the Canvas course page that can help you learn the course materials being covered?
 - a Office Hours, COM S Help room, Emails
